have /hæv/, **has, having, had**. **Have** is used in two main ways: as an auxiliary and as a main verb. The auxiliary uses are shown in paragraphs **1** to **6**, and the main verb uses from paragraph **7** to the end. The most common semantic meaning of 'have' is 'possess', and this is explained in paragraph **9**. The other common meanings of 'have' are explained from paragraph **10** to the end of the entry. **Have** is often contracted to **'ve, has** to **'s**, and **had** to **'d**. The forms **have, has, having**, and **had** are used in the following ways to express past time. **1** The forms **have** and **has** are used **1.1** when you mention an action that happened in the past but that is still relevant to the present, or when the action happened in the recent past. EG *We have already done that... I've just sold my car... Has she found a job yet?... I've never heard of it.* **1.2** when you mention an action that continues to happen from the past up until the present. EG *Dental decay in Britain has almost reached epidemic level... I've always supported Mr Heath and I still do... I've been thinking... I haven't been playing football recently.*

AUX + PAST PART : SEE ☐ BELOW AUX + PAST PART, OR AUX + *been* + -ING : SEE ☐ BELOW

2 The form **had** is used to indicate **2.1** that an action or situation occurred at a previous time. **Had** is often used when the clause in which it occurs is less important than another clause nearby. EG *He had known her for two years before he proposed... By 1950 more than half the land had been cleared for pasture... People have already forgotten, or had until last Tuesday.* **2.2** that you are reporting what someone said or felt in the past. EG *Officials said that Japan had agreed to restrict car shipments for three years... In half an hour Rudolph felt that he had known her for years.*

AUX + PAST PART, OR AUX + *been* + -ING : SEE ☐ BELOW AUX + PAST PART : SEE ☐ BELOW

3 **Had** is also used instead of 'if' to begin a clause which refers to a possible situation that is not the actual situation. The main clause uses modal verbs to suggest what might have happened if the situation had been the one that is mentioned. EG *Had his theories been accepted, the world might have been a better place... They could not have produced the consequences that they did had there not been other forces at work.*

AUX + NG/*there/it* + PAST PART : SEE ☐ BELOW

4 The form **having** is used to introduce a clause that mentions an action which had already happened before another related action began. EG *We were back in Edinburgh at ten past twelve having driven straight across the bridge again... Quite a few of the shop fronts were still boarded up, having closed down in 1930 or 1931.*

AUX + PAST PART : SEE ☐ SEE BELOW

5 The forms **have, has**, and **had** are used **5.1** with a pronoun at the end of a statement with 'have' in it to make it into a question, especially when you are expecting the other person to agree with you or to answer in a way that confirms what you already think. EG *You've got that, have you? Right... 'Do you want the insurance?'-'We'd better, hadn't we?'... 7 Have is frequently used with nouns as objects, where the word 'have' has very little meaning in itself, but where most of the meaning is given by the noun. The function of 'have' is thus to provide a verb for the structure and very little else. In this group there is always an equivalent verb for the 'have + noun' structure, so that 'to have a look' means almost the same as 'to look'. This structure is often chosen in order to emphasize that an action or event has a definite beginning or end, or in order to add more information about the noun. The following paragraph shows 'have' used in this way. **7.1** used with nouns that describe actions. EG *I had a little stroll round the garden this morning... You go and have a look... ...a herd of buffaloes having a bath in the river.* v + o = take **7.2** used with nouns which refer to communication between people. EG *In recent weeks he has been having talks with the bank... We're having a meeting. Come and join in.* v + o = hold **7.3** used with nouns which refer to the effect that one thing has on another. EG *What effect will this have on transportation? ...the very considerable influence which EEC law has on us... If this has no result, try a weak solution of bleach.* v + o **7.4** used to form nouns from verbs. EG *We've had a think about what to do... It's worth having a try... She sat down to have a quiet read.* v + o

8 Have is also used in this structure with some nouns which cannot themselves be used as verbs. Some examples of 'have' used in this way are given here. EG *The children are having a party... It had its first performance last week... They regretted having an October election... Let's have a celebration.* v + o

Note. In the rest of the entry for **have**, there is a relationship between **have** and **got**. Very often **have got** occurs in natural spoken English where **have** alone would also be correct. So you can say 'I have one brother and two sisters' or 'I've got one brother and two sisters'. This is a feature of spoken English, and it seems to arise from the fact that **have** is sometimes an auxiliary and sometimes a main verb. Adding **got** makes its status as an auxiliary quite clear. For further information about this and for more examples see **got**. **Have** sometimes shows grammatical signs of being an auxiliary verb when it is actually being used as a main verb. So that you can say 'Have you any brothers?' or 'Do you have any brothers?', 'I haven't any sisters' or 'I don't have any sisters'. For examples using 'have got', see **got**.

9 Have is used in the following senses to say that something is associated with or belongs to someone or something else. **9.1** If you **have** something such as a car or a house, it belongs to you. EG *What is the point of having a mink coat or a Rolls Royce, if everybody else does too?... Could you bring back my book please, now that you have one yourself.* v + o = possess **9.2** If you **have** a business or company, you own it and run it. EG *...a man who had a bakery in Port Philip... He had a small hotel.* v + o **9.3** If you **have** money or something that earns money for you, it is yours. EG *They don't have any money... My children have had bank accounts since they were eight... Both companies have a 23 percent interest in the well.* v + o = possess **9.4** If you **have** feelings or opinions, you feel or think in that way. EG *Do you have any doubts about it?... We had no regrets at all.* v + o **9.5** If you **have** a particular relationship or role, it is yours. EG *The Scots had more positions of influence than anyone else... We have a role in schools liaison work... He didn't have a very good reputation.* v + o = enjoy **9.6** If you **have** a job, you are employed and are paid. EG *I'm not getting anywhere in this job I have... She felt useless, despite having a successful career of her own.* v + o **9.7** If you **have** something in a particular place, you keep it there. EG *I don't have very much drink in stock... She always has dozens of tins in her cupboards.* v + o + A

10 Have is often used in structures where the meaning would be the same if you used the verb 'be', because you are talking about the attributes that something has. For example, when we say 'The house has a lovely view', we mean 'There is a lovely view when we look out of the windows'. EG *We have a plan... You have no alternative...
